

DWANGO™

COMPETITION ON DEMAND!

THE ULTIMATE HIGH SPEED
MULTI-PLAYER GAMING NETWORK

By purchasing **TERMINAL VELOCITY**,™ you have opened yourself up to a whole new world of network-speed online gaming with **IVS/DWANGO! IVS/DWANGO** is the ultimate online gaming network that allows you to play up to eight-player **TERMINAL VELOCITY**, as well as other blockbuster titles.

GETTING STARTED: To access this growing network of 64-line servers, first install your copy of **TERMINAL VELOCITY** and then follow the steps below.

From a DOS prompt:

1. Type **C: [Enter]** Assuming the drive letter that **TERMINAL VELOCITY** is on is drive C.
2. **CD\TV [Enter]** Assuming **TERMINAL VELOCITY** is in a directory called "TV."
3. **DTV [Enter]**

You will first be asked to choose your **BAUD RATE**, **COM PORT**, and your **MODEM TYPE**.

Once you have selected your settings, you will be asked to choose a server from the current list. This list will update from time to time, and you can always check for new servers by typing "dwango -server" from the DOS prompt. You will also need to specify whether the server you choose is a **LOCAL** or a **LONG DISTANCE** call, and you may disable call-waiting if you wish to prevent your games from being interrupted. Hit **F10** to begin your connection to **DWANGO**.

WHILE ONLINE: Your first time on **DWANGO**, you will need to answer a few basic questions about yourself. You will also be able to use a "handle" or "nickname" that people will know you as.

Once you have completed your question screen, you will enter a "lobby" where other players will be waiting to begin games. You may transmit a message to everyone in the lobby by typing the message and hitting enter. To send a private message in the lobby, begin the message with the person's name you wish to send the message to.

DWANGO does not charge fees for lobby time.

The following are the commands while in the lobby on **DWANGO**.
